After almost 6 years, we are proud to release the version 2 of the well known devFoam application.. Our CNC Contour Cutting Machines come in a standard and large Format size Xydroid Large Format CNC Contour Foam Cutting Machine The large format Xydroid contour cutting machine has all of the features included with the standard format hot wire cutter and more.. Versatile lathe, turntable and router options are available The software is easy to learn and is very user friendly 10' x 11' footprint & 54" x 54" x 104" cutting area The standard format Xydroid CNC foam cutting system is built with a heavy-duty frame and has the ability to cut up to 3 blocks of foam with up to 10 wires (models available with up to 60 wires).

This CNC foam cutter is built like a tank! We offer an optional coordinated software driven third axis for cutting complex columns like spiral/roped columns and 2D and 3D profiles on a turntable style format.. Xydroid Standard Format CNC Contour Foam Cutting Machine The standard format Xydroid EPS contour cutting machine is a true workhorse.. Xycorp's line of Xydroid EPS foam contour hot wire cutters do just what the name implies — cut contoured foam shapes.. When you're finished using this option you can get back to contour cutting in minutes.. The large format models provide longer and wider cutting areas which can provide customers with the capability of producing large foam shapes in a single piece.

With a 3rd and 4th axis, the machine is capable of plunging down into a slab of EPS foam and rotating to any angle you draw on the SimplePath™ program.. Optional Horizontal Lathe Axis The horizontal foam lathe includes a rotary axis motor driven head, tail stock, rails, motion control components and software to create very complex columns and other foam shapes in a lathe style format.. Like all of our machinery, this hotwire foam cutter is designed and built to provide our customers with a superior quality machine that will outperform our a competitors CNC foam cutter.. This option converts an existing Xydroid hot wire cutter into a lathe-cutting machine. [How To Block Fxfactory With Little Snitch](#)

fabricators to incorporate standard or rigid hot wire cutting into this coordinated 3rd axis.. Mechanically, its not complicated to make a CNC Hot wire cutter Using expensive software and difficult to find hardware for making their 4-axis foam cutter.. High yields help reduce waste and save money Vertical Cross Arm ConfigurationWhile our standard CNC foam cutting machines are engineered with a horizontal crossarm, we can manufacture machines with a vertical crossarm, for our customers who prefer or require that the hot wires cut vertically,Contour Machine OptionsChoose up the 3 optional features when building your contour machine to greatly expand your cutting capacity: Plunge Cutter & Router OptionOur plunge cutter/router option turns a contour cutter into a complete 3-in-1 machine.. Large Format CNC Contour Machine SpecsVersatile lathe, turntable and router options are availableThe software is easy to learn and is very user friendly12'X11' footprint & 108"x54"x104" cutting areaOptions also available for up to 204" of wire lengthThis system is built with a heavy-duty frame and has the ability to cut up to 3 blocks of foam with up to 10 wires (models available with up to 60 wires). Many shops must have a separate machine to turn columns in this manner Vertical Rotary Axis OptionThis option includes a rotary axis motor driven removable turntable, motion control components and software to create complex 2D and 3D objects for a Xydroid CNC Foam Cutter.. As with all of Xycorp's products our Xydroid CNC foam cutting machines are engineered for precision and constructed with the highest quality machined parts available.. This cuts down on machine time as well as fabrication labor costs We do offer other sizes and can build a custom sized CNC foam cutter to meet specifications if needed. e828bfe731 [Biblia Reina Valera Pdf Descargar Gratis](#)
